

I'm proud of what we do:

We make your driver's
license ready for the
smartphone.

Veridos handles innovative, large-scale projects every day. Whether it's transferring 40,000 handwritten pages to a centralized population register, establishing a nationwide IT and data capture infrastructure, or issuing a country's first standardized national smart ID cards - the experts at Veridos can expect to be regularly involved in interesting, ground-breaking and large-scale projects such as these.

Do you want to support our mission to provide governments around the world with the best identity solutions for their citizens? Would you like to do your bit to make the world a little safer for everyone?

Veridos is a valued and trusted partner of governments and regional authorities all over the world - we already count more than 70 countries among our clients. In addition to our headquarters in Berlin and offices in Munich, Veridos also has representatives around the world, including the United States, Canada, Mexico, Singapore, and the United Arab Emirates. We currently employ around 500 people worldwide.

Our very international team includes people from a variety of academic and professional backgrounds and many different countries. Collectively, we speak more than ten different languages.

Technology is our major strength. Trust is our most valuable asset.

Reliable identification is a key factor for open, secure societies and free travel. Veridos is a leading global provider of integrated identity solutions. Governments and regional authorities worldwide rely on the company's uniquely comprehensive product portfolio. In our innovation department, our multicultural, interdisciplinary team searches for new revolutionary identity solutions and business ideas, validates them with market research, builds and tests prototypes and helps to develop the first minimally viable products for a customer. The team focuses on new technologies such as mobile applications, artificial intelligence, augmented reality and biometrics. We lead EU research projects with a variety of partners including universities, independent research institutions and end customers. In our current EU research project "D4FLY" we investigate new methods to detect document forgery and identity theft and to accelerate identity verification at the border. For this we are looking for one:

Software Test / System Test Engineer (m/f/d) Innovative Identity Solutions

Your responsibility:

- You will research new concepts for innovative identity verification using modern technologies such as mobile applications, artificial intelligence, augmented reality and biometrics.
- Together with our partners and the Innovation Team, you will develop the required prototypes to test the new concepts. You will be responsible for configuration management, test automation and the development of the required test scenarios and test cases.
- You will present the developments to stakeholders and customers in events, trials and pilot projects, determine and document the feedback from end users and contribute it to the development process.

Your profil:

- You are enthusiastic about new technologies, creative, unbiased about unusual solutions and look forward to working independently in a multicultural and interdisciplinary team.
- You enjoy putting systems through their paces and discussing improvements with international end users and customers. You find other cultures enriching.
- You have experience in testing software products, configuration management and modern test methods as well as software development.
- You are experienced in working with office applications such as Word, Excel and PowerPoint.
- You have a degree in a scientific / technical field of study or a comparable education.
- Your English (spoken and written) is business fluent. We are an international and diverse team that communicates in English. Communication with international end users and customers is in English. Another foreign language such as French or Arabic would be an advantage.

That's what we offer you:

- Benefit from flexible working hours and 30 days of holiday per year.
- Take advantage of our wide range of training and further education opportunities.
- An exciting field of activity as well as opportunities and possibilities to work in an international and dynamic environment.
- Working side-by-side with committed and competent colleagues is a matter of course for us.
- We also provide a pension plan paid by the company.

We look forward to receiving your online application at www.veridos.com/en/careers.
